

IMPORTANT NOTICE

Breckenridge Public Utilities (BPU) has completed and submitted our service line materials inventory to the Minnesota Department of Health. The service line inventory is publicly available, and you can check the materials for your service line by visiting the Lead Inventory Tracking Tool (LITT) at <https://maps.umn.edu/LSL/>. To complete the service line inventory, our Utility solicited information from residents who were able to identify their own water line and BPU assisted others by performing physical inspections of all other water service lines in our service territory. After completing our inspections in May of 2024, our inventory contains 43 lead lines and 56 galvanized lines. These lines will be replaced in the coming years as monies become available from the state. The remaining 1331 service lines are either Copper or Poly and require no action.
